

# ACSA Educational Options Council

6 November 2019

**Speaker: Greg Wohlman**

**Presentation: Alternative Accountability through School Accountability Plans, WASC, Model School, and LCAP**

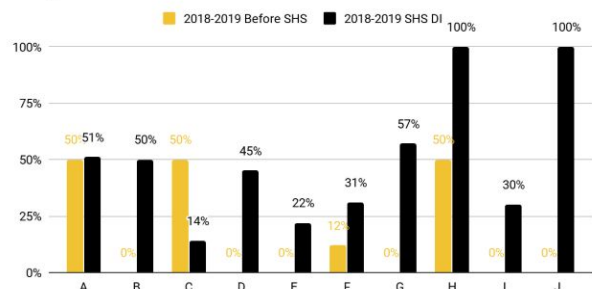

Reduce the number and amount of reports the schools create to address accountability. The goal is to uncover accountability measures that truly demonstrate progress on school goals.

Much of the data typically provided is not mathematically valid due to student mobility and the unique features of alt ed.

Greg submits his SARC in lieu of a WASC report. No CAASPP data is included as it is faulty in his view.

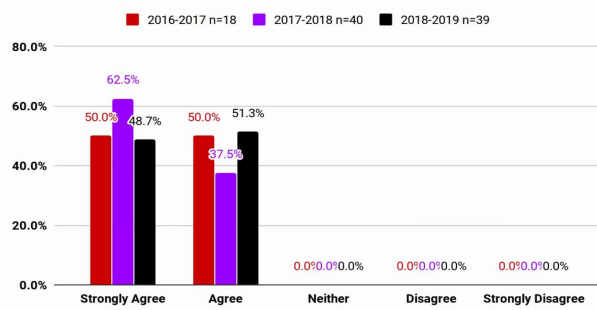

Data they collect:

**Math credits earned before SHS and in SHS Direct Instruction Integrated I Class 2018-2019 n=10**

In the chart above at right, letters on the horizontal axis represent individual students.

**The school gives me the tools I need to grow as a person**

Find data to report that tells your story.

Have real, quality expectations that make a difference for your students.
